## FTI 1156 Lead Awareness

### Course Information

**Course Hours:** 2

**Course Description:** This is a lead awareness course that provides a closer look at its prevalence in the work and public environments. It will also present a toxicological profile of lead, increasing participants understanding of why they should avoid exposure. The course will review pertinent worker protections through a review of the general industry and construction standards, and present an example lead control plan for work on superstructures.

### Course Objectives:

- State how workers and the public are exposed to lead.
- Explain the health hazards of lead.
- State when respirators are necessary.
- Explain what medical monitoring means.
- State PELs and trigger for medical removal.
- Look up information in the OSHA General Industry and Construction Lead standard.
- Evaluate a lead control plan for worker protection elements.
- List three ways to control lead exposure.

**Prerequisite/s:** None
